

Smart Plug EP2-MT

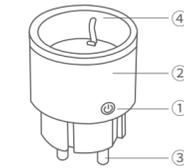

**Parts Included**

- Smart Plug x 1
- User Manual x 1

Only 2.4G Wi-Fi is supported.

**At a Glance**

- ON/OFF Button
- Flame Resistant Material
- Power Plug
- Socket Panel

**Parameters**

Smart Plug EP2-MT  
 Input: AC 230~250V, 50/60HZ, 10A MAX  
 Wireless Standard: 802.11b/g/n 2.4 GHz  
 Operating Temp: -20°C ~ 40°C  
 Frequency Range: 2412-2482MHz  
 Transmitting Power (dBm) : ≤19dBm

**Main Features**

- Voice Control
- APP Control
- Scheduled Control
- Device Share
- Compact Design
- V0 Fireproof

**BEFORE WE START**

- Ensure your mobile phone's Wi-Fi is turned on and is connected to your home 2.4GHz Wi-Fi network. If your Wi-Fi router supports both the 2.4GHz and 5GHz dual bands, set their Wi-Fi names (SSID) differently or turn off the 5GHz from the wireless page of the router (the entry address is usually provided on the label attached to the back of the router), then connect your phone to the 2.4GHz Wi-Fi network.
- Ensure your mobile phone's Bluetooth is turned on.
- Prepare the Wi-Fi password of the Wi-Fi network that your mobile is connected to 2.4GHz Wi-Fi.

**Option1: Use the GHome App**

a) **Download the App**

**Option 1:** Search for "GHome" in the Apple App Store or Google Play.

**Option 2:** Scan the QR code below to enter the download page.

**Note:** Ensure your phone runs iOS 11+ or Android 6.0+ for a smooth connection. If you have any questions, please consult our customer serv

b) **Complete Setup in GHome App**

**Pair with the App by Scan the Matter QR**

- Power on the smart device and ensure that the indicator light is blinking - this indicates that the device is in pairing mode. If not, press and hold the switch button of the smart device for 5 seconds until the indicator light starts blinking. The pairing mode will last for 3 minutes.
- Open the App, click "+" at top right of "Home" page and choose "Scan".
- Scan the Matter QR code on the smart device.
- Follow the instructions in the App to finish setup.

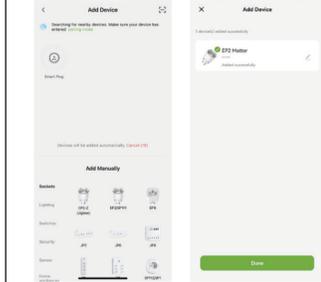

The QR code for Matter network configuration on each device is unique. Please keep it safe.

**Pair with the App by Bluetooth Auto-Discovery mode**

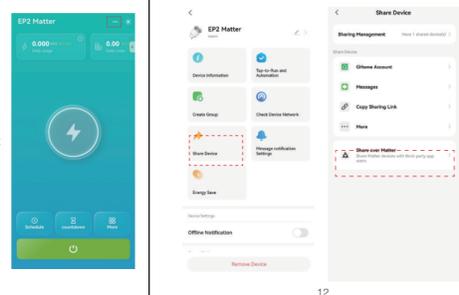

The app will suggest you to turn on Bluetooth and Wi-Fi on your phone, then select the device you want to add. Enter your Wi-Fi name and Wi-Fi password (supports 2.4G Wi-Fi only).

- When the smart plug indicator is flashing green, it has entered pairing mode. If it is not flashing, press and hold the power button for 5 seconds to reset.
- Open the app and tap the "+" icon in the upper-right corner of the home screen. Select "Add Device."
- From the device list, choose "Smart Plug" to add.
- it will automatically connect to the network.

3) **The EP2-MT supports multi-platform control**

- First, pair the smart plug WPS using the GHome App or SrdParty M after-enabled Apps.
- After successful pairing, go to the device homepage -> tap the settings page in the top-right corner - select the Share function - generate a sharing code and a sharing QR code.
- Use 3rd Party Matter-enabled Apps to scan the sharing QR code or enter the sharing code to pair the device.

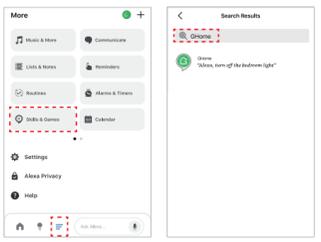

**Note:**

- The validity period of the sharing code or sharing QR code generated by the app is time sensitive, and the validity period varies depending on the app.
- Once the sharing code or sharing QR code is used once, it will become invalid and you need to obtain a new one.

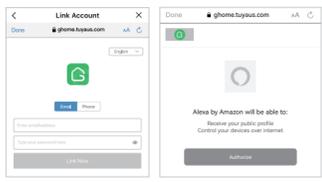

d) **Connect to Amazon Alexa App**

**NOTE:** Operation Without the GHome App

- Open the Amazon Alexa App and tap "Skills and Games" from the "More" menu.
- Search the Skill name "GHome".
- Tap "Enable to use".
- If necessary, type in your GHome login information from the App account and grant authorization in the App.
- Then you can control your devices in Amazon Alexa App or using voice through your Amazon Alexa devices.

15

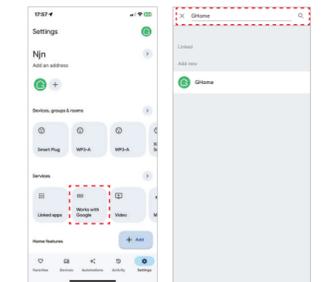

16

e) **Connect to Google Home/Google Assistant App**

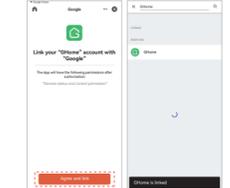

1a. If you're using Google Home App, open the App and tap the add icon "+" on the top left. Then find "Work with Google" from the list in "Set up device".

1b. If you're using Google Assistant App, open the App and tap your account name on the top right and then tap "Devices". Find "Link a device" from the list in "Add a device".

- Search the name "GHome".
- Tap "Continue".
- Then you can control your devices in Google Home/Google Assistant or using voice through your Google Home devices.

18

19

**Create GHome Account First**  
 Due to the limitation of the system, you will need GHome account to connect with Amazon Alexa App or Google Home/Google Assistant App.

**OPTION 2: USE 3RD PARTY MATTER-ENABLED APPS**

a) **Check Compatibility**

A compatible Matter-enabled hub is required for integration with the respective 3rd party Apps. Before operation, please ensure you have a required matter-enabled hub.

Ecosystem	App	Matter-enabled Hub
Apple	HomeKit	HomePod (2nd Generation)
		HomePod mini
		TV 4K (3rd Generation)
Google	Google Home	Nest Hub (2 Generation)
		Nest Hub Max Nest WiFi Pro
Amazon	Amazon Alexa	Echo 4
		Eero 6
		Eero 6 Pro
		Eero Pro
Samsung	SmartThings	1. SmartThings Hub V3
		2. SmartThings Hub V2

The list provided on the previous page is only a partial reference and may not include all items. Please refer to the websites of each ecosystem for the latest compatible matter-enabled hubs.

b) **Download the App**

Search Matter-enabled Apps (including but not limited to HomeKit, Google Home, Amazon Alexa and SmartThings) from the Apple App Store or Google Play.

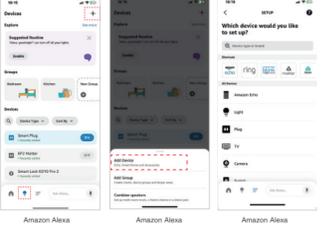

\*The App icons shown above are for reference only. Please refer to the actual App icons on your phone for accuracy.

c) **Complete Setup in 3rd Party Matter-enabled Apps**

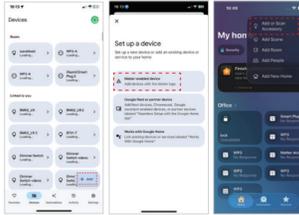

- Power on the smart device and ensure that the indicator light is blinking this indicates that the device is in pairing mode. If not, press and hold the switch button of the smart device for 5 seconds until the indicator light starts blinking. The pairing mode will last for 3 minutes.
- Open the App.
- Scan the Matter QR code on the smart device.
- Follow the instructions in the App to finish setup.
- You also can enter the device setting page and get a new pairing code for device setup in other Matter-enabled Apps.

**Amazon Alexa**

24

**Google Home&Home Kit**

25

**Warning:** Please note that the actual steps may differ based on the specific App. For accurate instructions, refer to the corresponding App and contact their customer service for any inquiries. The QR code for Matter network configuration on each device is unique. Please keep it safe.

**Reset**

Turn on the power, hold the Switch/Pairing button for 5 seconds, and let it go, when the socket starts blinking, the reset process is successful.

When the socket is in a new network environment, you need to restore the factory settings, and then reconnect to the network.

**FAILED TO SET UP**

- Check if your Smart Home App is up to date via the App Store.
- Check if your Matter Hub is updated with the latest firmware available.
- Confirm that both your phone and Matter Hub are connected to the same 2.4 GHz Wi-Fi network, and that the network has an active internet connection during the setup process.
- Note that the Matter pairing mode is available for a limited time of 3 minutes. If your Matter device has been powered on for a longer duration and the indicator light stops blinking, you should re-enter the pairing mode by pressing and holding the switch button of the smart device for 5 seconds until the indicator light starts blinking.

5. Reset the Matter-certified device by pressing and holding the switch button of the smart device for 5 seconds and retry the setup process.

**Warnings and Precautions**

**Important!**

Keep it out of the reach of children and pets. Do not use this product in a humid environment or outdoors. It's for indoor use only.

Do not place this product near heating devices, such as microwave ovens, stoves, or radiators.

Protect the product from extreme temperatures, direct sunlight, strong jolts, high humidity, moisture, flammable gases, vapors and solvents.

Do not disassemble, modify, or repair your device, and ask help from the authorized professionals for device malfunction.

Do not use the device when it is no longer working properly or visibly damaged.

Do not store the device for extended periods in poor ambient conditions.

Do not insert your device to another one.

Never use aggressive detergents such as alcohol or other chemical solutions because these could damage the casing or even impair the functioning of the product.

**Note:** The image shown in the manual is indicative only. If there is inconsistency between the image and the actual product, the actual product shall govern.

**WEEE Disposal and Recycling Information**

All products bearing this symbol are waste electrical and electronic equipment (WEEE) as in directive 2012/19/EU which should not be mixed with unsorted household waste. Instead, you should protect human health and the environment by handing over your waste equipment to a designated collection point for the recycling of waste electrical and electronic equipment, appointed by the government or local authorities. Correct disposal and recycling will help prevent potential negative consequences to the environment and

human health. Please contact the installer or local authorities for more information about the location as well as terms and conditions of such collection points.
